

CMOS Compatible Enable/Disable
HS-A1370/A1380 Series

Description

The **HS-A1370 Series** of quartz crystal oscillators provide enable/disable 3-state CMOS compatible signals for bus connected systems. Supplying Pin 1 of the **HS-A1370** units with a logic "0" enables the output on Pin 8. Alternately, supplying pin 1 of the **HS-A1380** units with a logic "1" enables its Pin 8 output. In the disabled mode, Pin 8 presents a high impedance to the load. All units are resistance welded in an all metal package, offering RFI shielding, and are designed to survive standard wave soldering operations without damage. Insulated standoffs to enhance board cleaning are standard.
